

Formative and Summative Assessments

Liz Fisk

WSWHE BOCES

Data Analyst

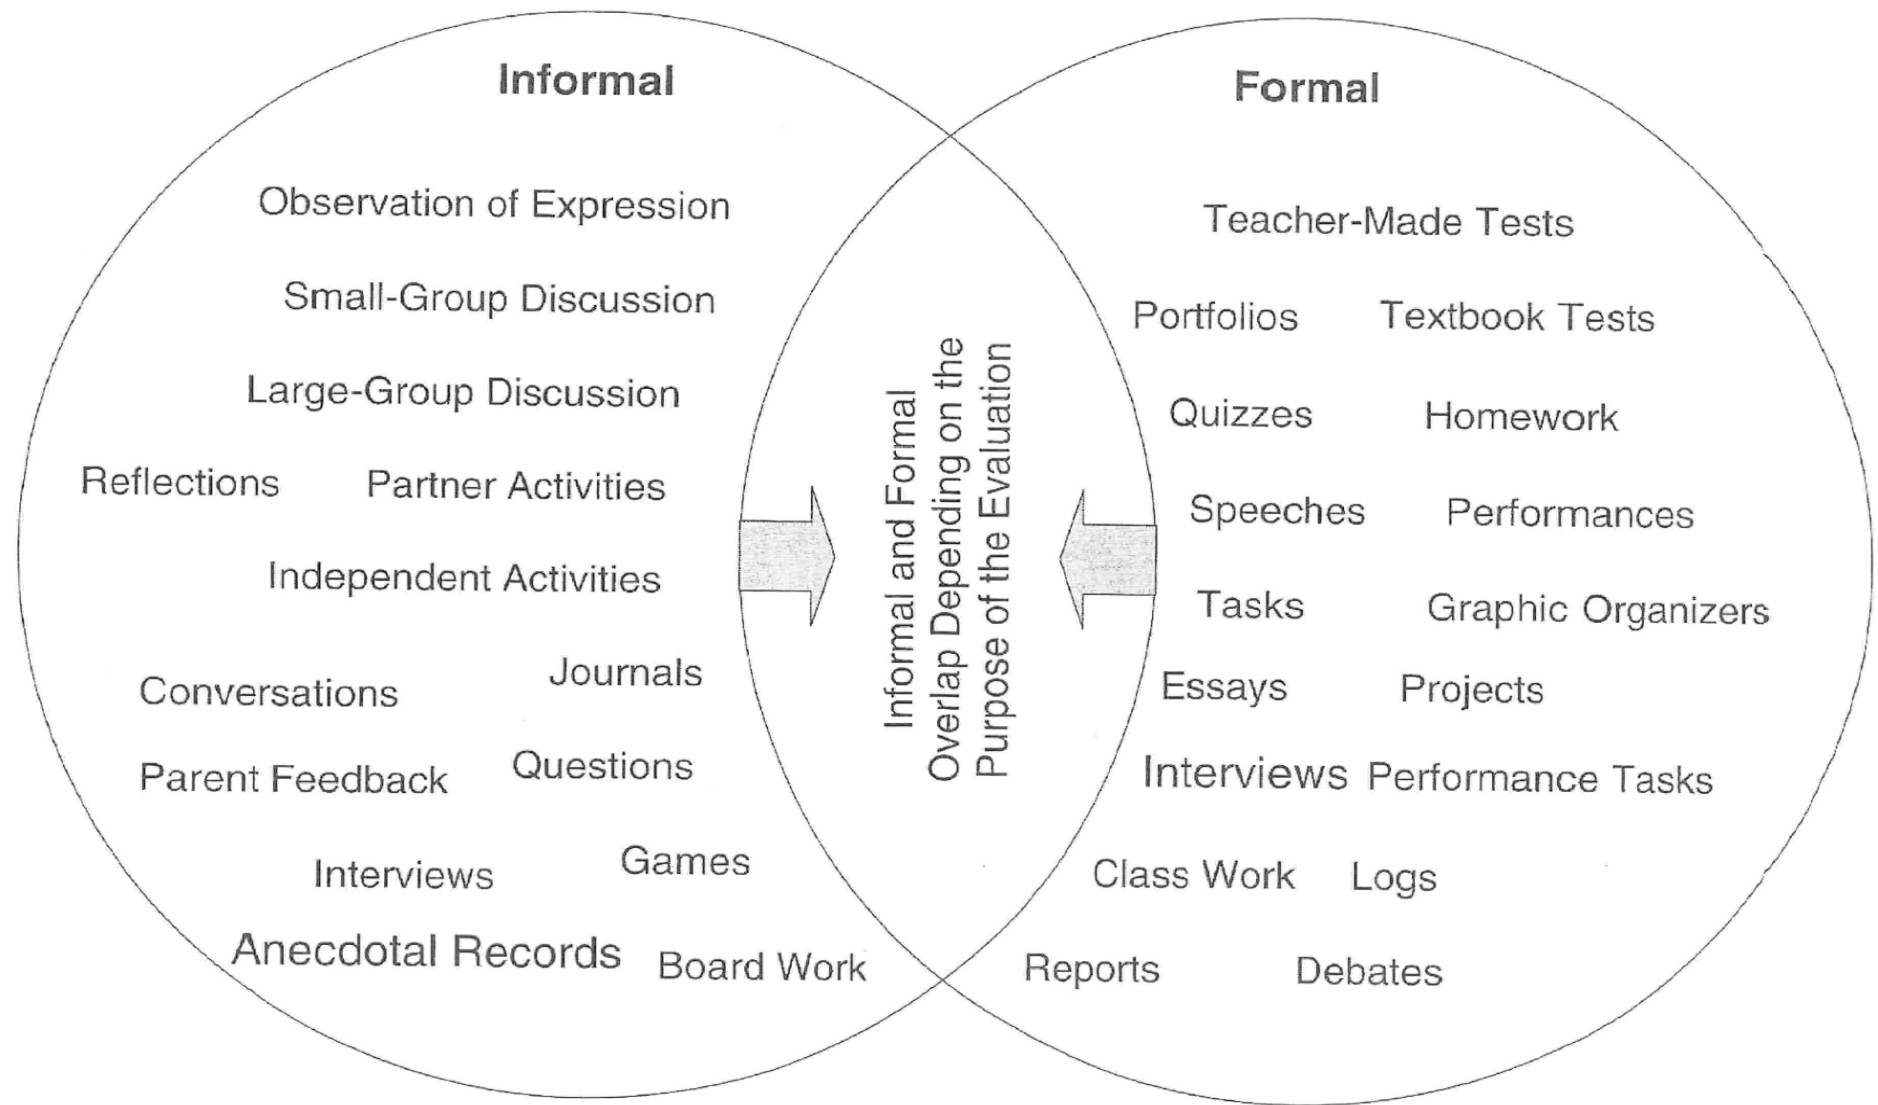

Agenda

- Keys to quality classroom assessment
- Formative vs. Summative
- Finding balance
- Grading implications

Purpose of Assessment

- When would you use this type of assessment?
 - BEFORE instruction
 - DURING instruction
 - AFTER instruction
 - AT INTERVALS

Classroom Assessment

(Depka, 2006)

Aligning Achievement Targets to Assessment Methods

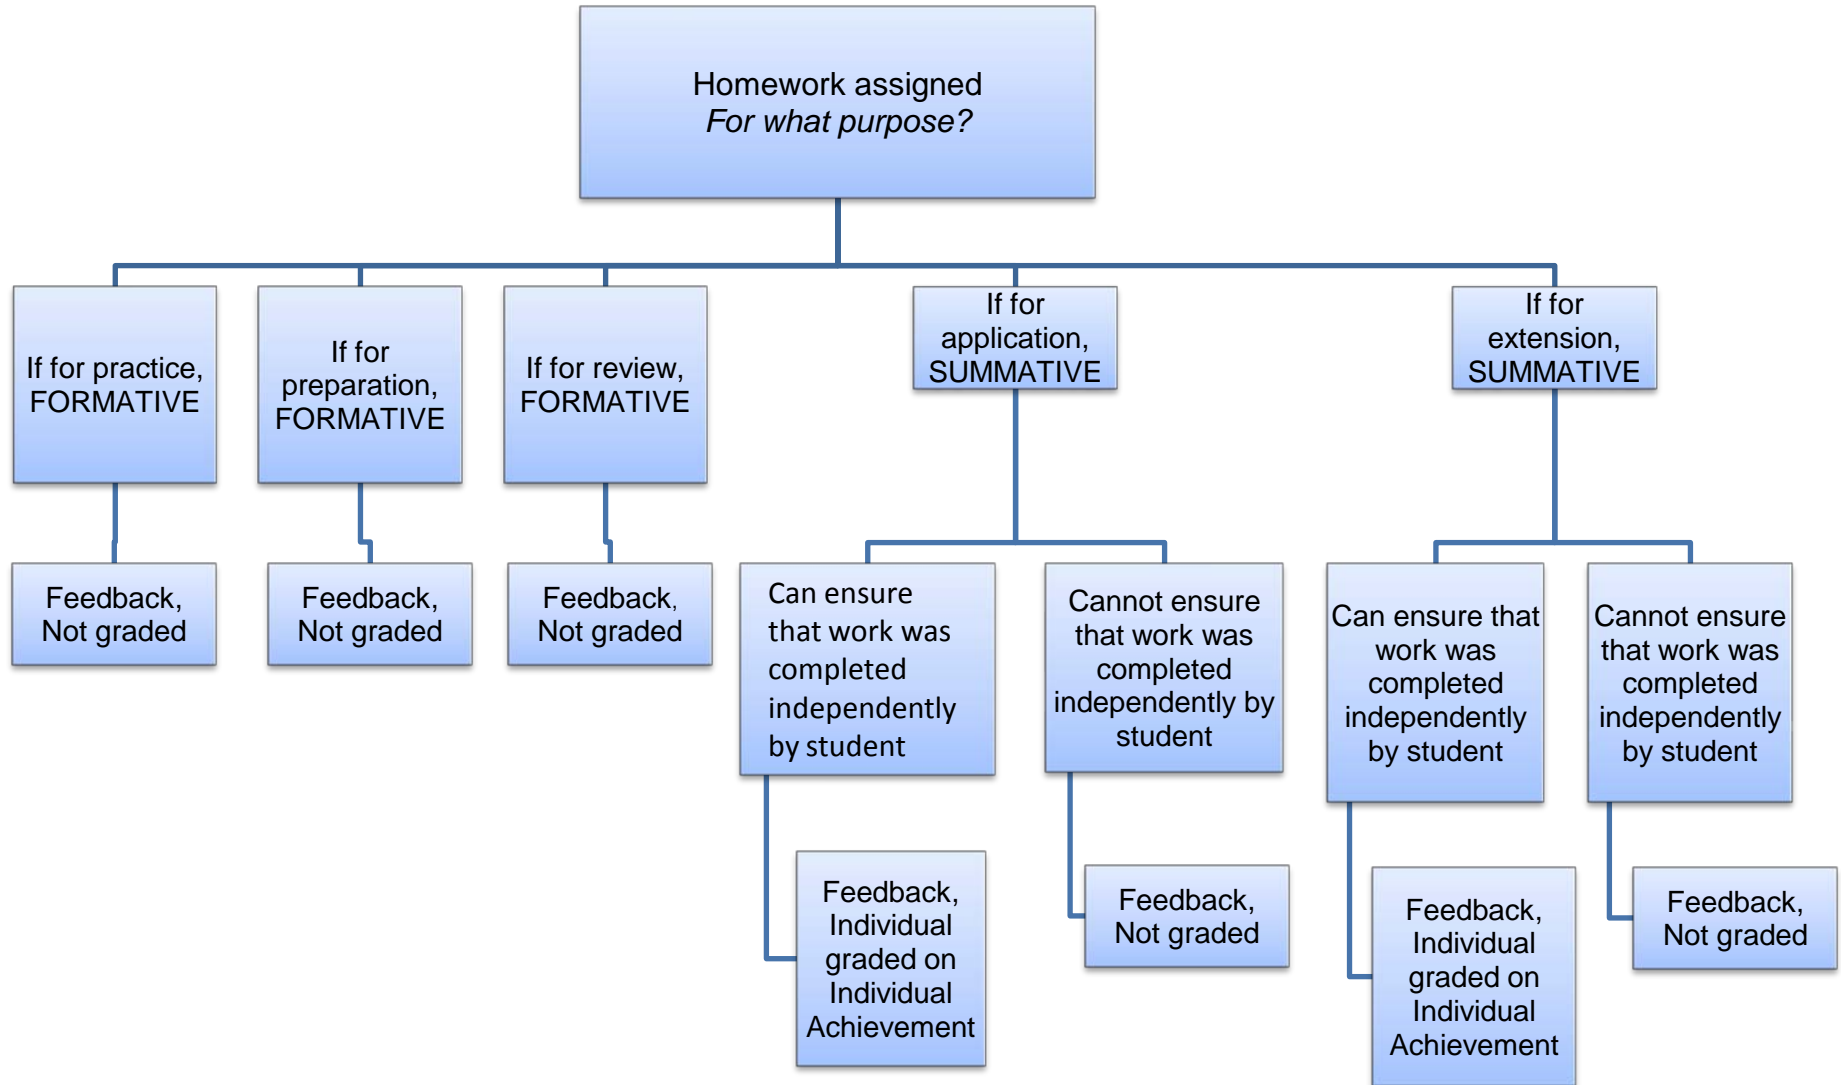

TARGET TO BE ASSESSED	ASSESSMENT METHOD			
	SELECTED RESPONSE	ESSAY	PERFORMANCE ASSESSMENT	PERSONAL COMMUNICATION
KNOWLEDGE MASTERY	Multiple choice, true/false, matching, and fill-in can sample mastery of elements of knowledge	Essay exercises can tap understanding of relationships among elements of knowledge	Not a good choice for this target	Can ask questions, evaluate answers and infer mastery—but a time-consuming option
REASONING PROFICIENCY	Can assess understanding of basic patterns of reasoning	Written descriptions of complex problem solutions can provide a window into reasoning proficiency	Can watch students solve some problems and infer about reasoning proficiency	Can ask student to “think aloud” or can ask followup questions to probe reasoning
PERFORMANCE SKILLS	Can assess mastery of the prerequisites of skillful performance, but cannot tap the skill itself—not a good choice for this target	Can assess mastery of the prerequisites of skillful performance, but cannot tap the skill itself—not a good choice for this target	Can observe and evaluate skills as they are being performed	Strong match when skill is oral communication proficiency; also can assess mastery of knowledge prerequisite to skillful performance
ABILITY TO CREATE PRODUCTS	Can assess mastery of knowledge prerequisite to the ability to create quality products, but cannot assess the quality of products themselves—not a good choice	Can assess mastery of knowledge prerequisite to the ability to create quality products, but cannot assess the quality of products themselves—not a good choice	A strong match; we can assess: (a) proficiency in carrying out steps in product development, and (b) attributes of the product itself	Can probe procedural knowledge and knowledge of attributes of quality products—but not product quality

Formative vs. Summative

- Key differences between formative and summative
 - Stiggins video clip
 - Chart

Homework

Creating Balance

- Assessment Audit
 - How often are different methods being used?
 - Connection between formative and summative
- Other Considerations
 - Quantity vs. quality
 - Fast vs. accurate
 - Consistency vs. uniformity
 - Achievement vs. growth

What does this have to do with grading?

- FIX 1
- FIX 13
- FIX 14
- FIX 15
